Combines sound technical frameworks with appealing media assets to generate front-end solutions focused on expanding user bases. Practiced at creating innovative online experiences to generate profits and grow average revenue per visit.

Work history

2026-01 -
Current

Frontend Engineer

Pixelate Everything Sdn Bhd, Kuala Lumpur, Malaysia (Remote)

- Architected and scaled a high-frequency, multi-tenant white-label iGaming platform using a unified, dual-framework enterprise workspace.
- **Multi-Tenant Monorepo:** Built a **Turborepo/Nx** workspace hosting shared packages and independent brand web applications, reducing redundant code by 45%.
- **Dual-Framework Integration:** Cohesively integrated performance-driven **Next.js/React** client dashboards with specialized **Vue.js** casino modules.
- **Real-Time WebSockets:** Designed a low-latency **WebSocket** layer to stream live odds and bet-slip metrics without UI thread jank.
- **Token-Based Multi-Theming:** Created a runtime theme-swapping engine utilizing **Ant Design** (ConfigProvider) and CSS variables for instant tenant white-labeling.
- **Global Localization Engine:** Implemented a foolproof **i18n** and **multi-timezone** framework to normalize live event schedules and countdown timers globally.

Freelancer

Freelancers Union, Kuala Lumpur

- Uniapp Framework Development:
- 1. Collaboration with Chinese Partner: As a freelance developer for this project,

RESTful apis

Version control

Figma software

Languages

English

Chinese (Cantonese)

Chinese (Mandarin)

2024-09 -
2025-12

Collaborated with a Chinese partner to develop a Uniapp framework. Clear and effective communication to ensure that both parties are aligned on the project requirements, timelines, and deliverables.

- 2. Tech Stack: The project will involve working with Uniapp, Element UI, Formik, Redux, VueJS2, ES6, WeChat Payment, and aapanel.
- 3. Development of Payment Gateway: A key feature of the project is the integration of WeChat Payment. Experience with this payment gateway and ability to implement it seamlessly within the Uniapp framework.
- NextJS and React Project:
- 1. Admin/Client Dashboard: As a freelance developer, responsible for building both the admin and client side dashboard for this project. This will require a solid understanding of both NextJS and React, as well as experience building dashboards with these technologies.
- 2. NextAuth Integration: The project will require the integration of NextAuth for authentication and authorization.
- 3. Integration with Axios and Redux: The project will involve integration with Axios and Redux to manage data requests and state management.

Frontend Developer

Haiya Sdn Bhd, Kuala Lumpur (Remote)

- Spearheaded R&D initiatives focused on system architecture optimization and emerging technology integration.
- Collaborated with cross-functional teams to build scalable, high-efficiency solutions.
- Proposed and advocated for the adoption of UmiJS, React Native (Expo), Ant Design Proadmin, Flutter to streamline cross-platform development and improve maintainability.
- Coded using HTML, CSS, and JavaScript to develop features for both mobile and desktop platforms.
- Collaborated with back-end developers to improve website functionality and integrate new features.

- Payment Gateway reverse engineering using Charles Jar

2024-03 -
2025-09

Senior Frontend Developer

Plaza Premium Group, Kuala Lumpur

- Created a reusable component library for the web application using Angular Material, resulting in faster development time for new features.
- Developed a modular, single-page web application in Angular that incorporated responsive design principles.
- Leveraged the Android SDK to create custom views and animations, enhancing the user experience.
- Deliver Postman Environment setup and transition handling Smart Traveller App.

2023-06 -
2024-03

Frontend Developer

Snsoft Sdn Bhd, Kuala Lumpur

- Scrum Master overseeing project progress, reporting to managers on timely updates.
- Enhance Vue2 to Nuxt.js application to boost optimization and performance.
- Successfully completed HLS player-based live-streaming project with Danmaku integration.
- Ensured project timelines and milestones were met effectively and efficiently.
- Create a web-socket integration to get response data from back-end.

2022-06 -
2023-07

Frontend Developer

First Pavilion Global, Kuala Lumpur

- Worked on internal and external projects with great care.
- Effectively coded software changes and alterations based on specific design specifications.
- Skilled in Material UI, Antd, Chakra UI, and Tailwind CSS is proficient in building user interfaces for web and mobile applications.
- Material UI and Antd are popular React component libraries that provide pre-designed components, while Chakra UI and Tailwind CSS are CSS frameworks that offer a variety of styling options.

- Having experience in global state management with Redux and Zustand, API handling, and authentication and role-based access development enables a developer to build robust and scalable web applications.
- Proficiency in Solidity smart contract development and experience in ThirdWeb framework development are valuable skills for building decentralized applications (DApps) on the Ethereum blockchain.
- Experience in CI/CD with GitHub and Agile project management with Jira.
- Experience in Vercel deployment, payment gateway integration, and AAPanel Nginx setup for scalable and secure web applications.

2018-12 -
2021-10
